Sat, 01 Dec 2018 06:56:00 GMT CVX: Matlab Software for Disciplined Convex Programming ... - In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ... Wed, 05 Dec 2018 06:59:00 GMT Mathematical optimization - Wikipedia - In mathematical optimization theory, duality or the duality principle is the principle that optimization problems may be viewed from either of two perspectives, the primal problem or the dual problem. The solution to the dual problem provides a lower bound to the solution of the primal (minimization) problem. However in general the optimal values of the primal and dual problems need not

be equal. Thu, 06 Dec 2018 01:21:00 GMT Duality (optimization) - Wikipedia - What is disciplined convex programming?¶ Disciplined convex programming is a methodology for constructing convex optimization problems proposed by Michael Grant, Stephen Boyd, and Yinyu Ye , .It is meant to support the formulation and construction of optimization problems that the user intends from the outset to be convex.. Disciplined convex programming imposes a set of conventions or rules ...
